

School District of New Holstein

Curriculum resources are selected and approved to ensure alignment with Wisconsin Academic Standards and to support high levels of student learning and achievement. All instructional materials undergo a thorough review process to ensure they are research-based, developmentally appropriate, and reflective of best instructional practices. Resource selection follows established Board of Education policy and includes input from educators, administrators, and other stakeholders to ensure materials meet the diverse needs of all learners across the district. Please direct any questions you have regarding curricular resources to the Director of Curriculum and Instruction.

Grade level	ELA/Literacy	Math	Science	Social Studies
4K	In 4K, we believe that play is the foundation of early childhood education where children can explore, learn, and grow in an engaging environment. Language development is at the core of play and children have numerous opportunities to develop their oral language skills. We believe children can take risks by tackling challenges, problem solving and foster growth mindset. Children are encouraged to discover new ideas and spark curiosity while matching their diverse interests and strengths. Academic content is thoughtfully woven into daily play-based experiences to support early learning across all developmental domains.			
	Literacy: Amplify Core Knowledge Language Arts (CKLA) Adopted 2024
